One-Stop-Shop Implementation in Slovenia ?

ARTICLE 51 OF THE ACT OF PROMOTION OF THE USE RES

Article 51 -> The tasks of the RES contact point are part of the activities of the support centre (Borzen), who can cooperative with local energy organizations.

<https://borzen.si/en-us/>

At the end of August 2023, GOLEA - Goriška Local Energy Agency, on behalf of the LEA Consortium, concludes a contract with Borzen on the implementation of the tasks of the RES contact point.

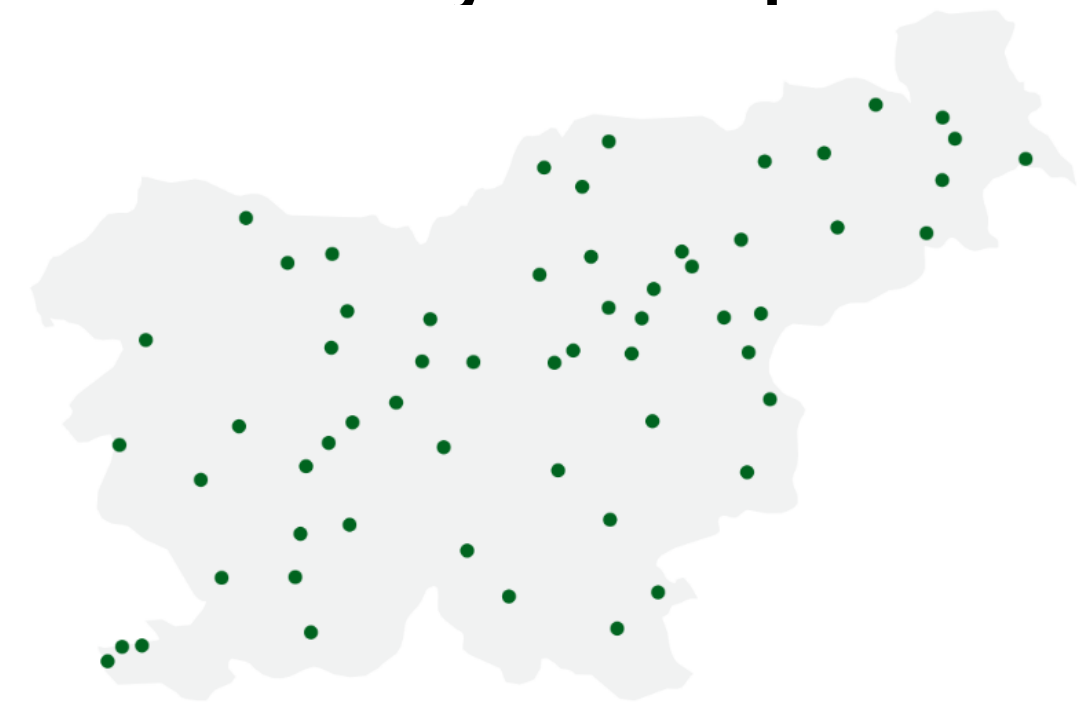

TASK COMPLETED CP-RES IN 2023

- basic training of the first generation of CP-RES energy consultants (30)
- start of building a network of consulting offices (individual LEAs started and then invited fellow consultants from the ENSVET network to the network)
- identification of potential RES projects with an emphasis on photovoltaic power plants in Slovenian municipalities (over 800 potential project were registered)
- preparation of studies on the establishment of energy communities with examples of good practices, installation of photovoltaics on cultural heritage buildings, agro-photovoltaics, etc.
- network of advisory offices (KT-OVE) CP-RES today

ENSVET network (Eco Fund)
after 20 years of operation

One-Stop-Shop Implementation in Slovenia ?

Consultants are mostly the same people.

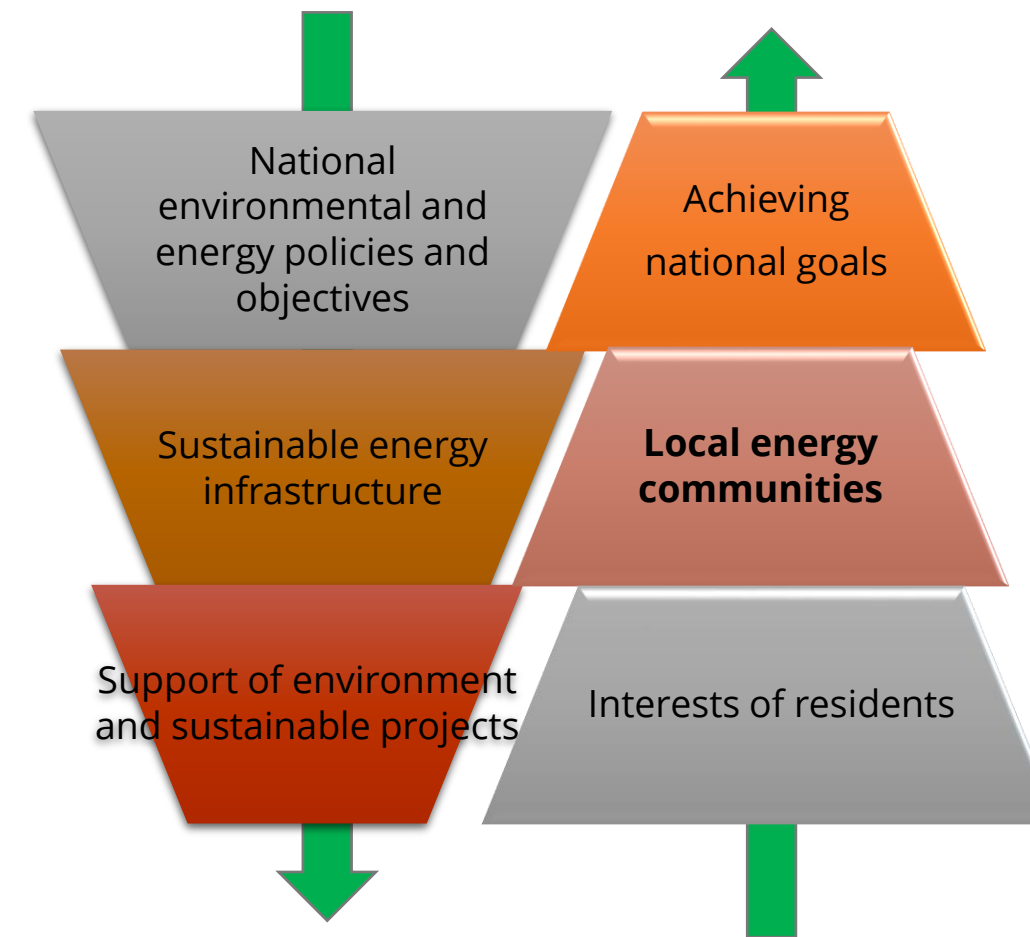

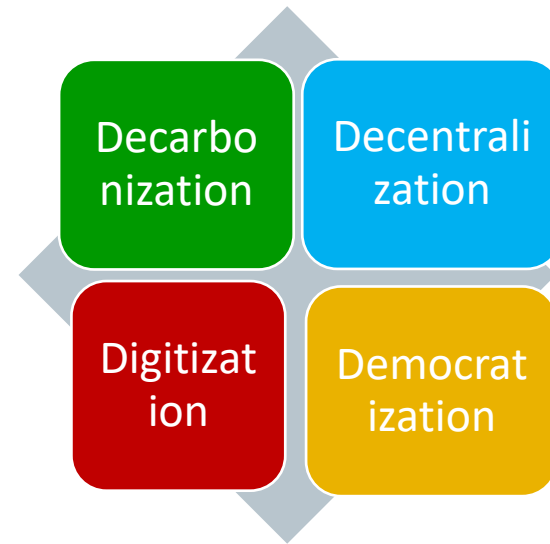

TASK COMPLETED CP-RES IN 2024 and 2025

- continuing education for consultants
- basic training of the second and third generation of CP-RES energy consultants (together over 50)
- start of operation of advisory offices in municipalities for citizens and entrepreneurs:
a total of 1,188 consultations in 2024
in 2025, already 1,239 consultations
- Conducting workshops on the topic of investing in municipalities and chambers of commerce and trade:
14 workshops in 2024
in 2025, already 6 workshops
- Participations in fairs

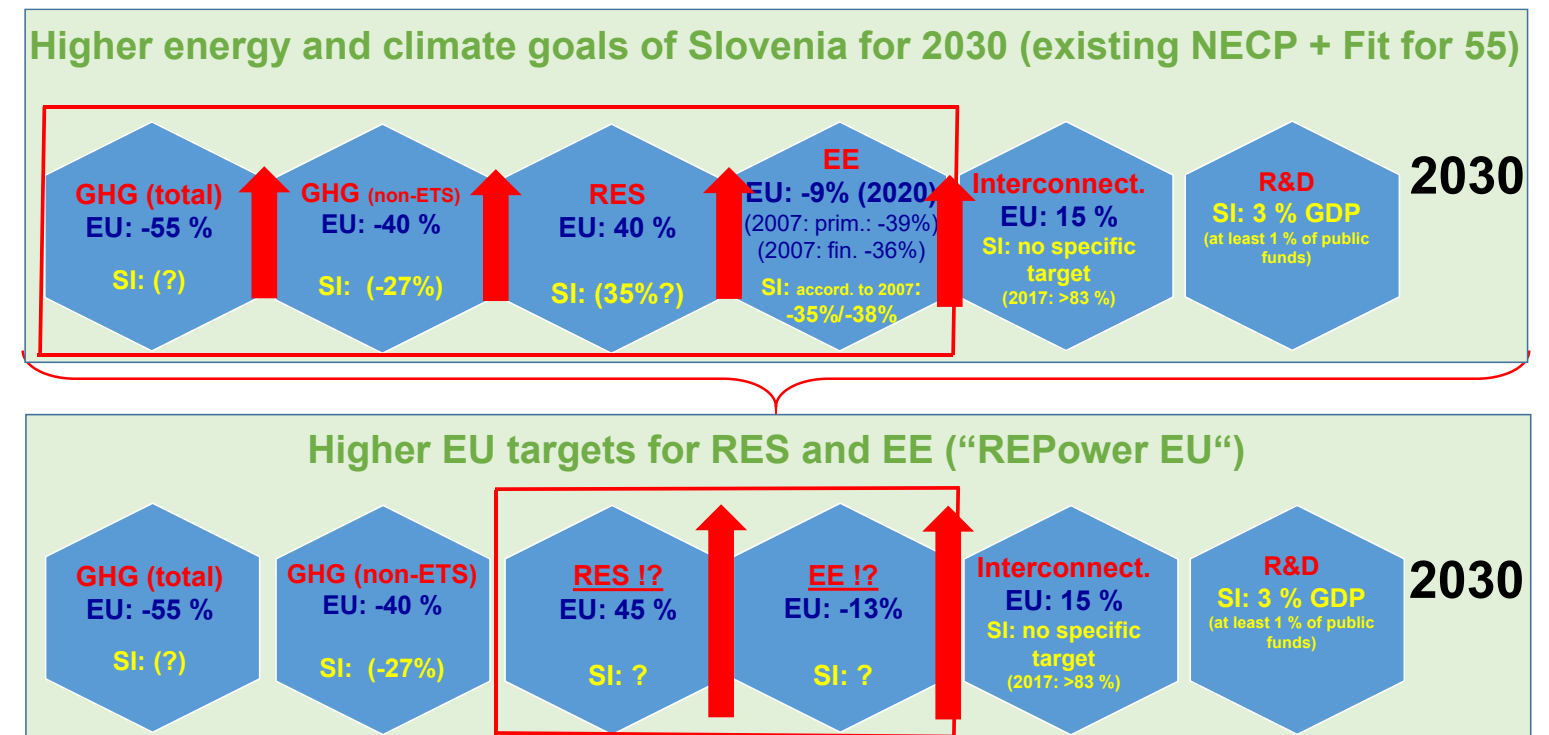

BOTTOM-UP COMMUNITY-BASED PROJECT

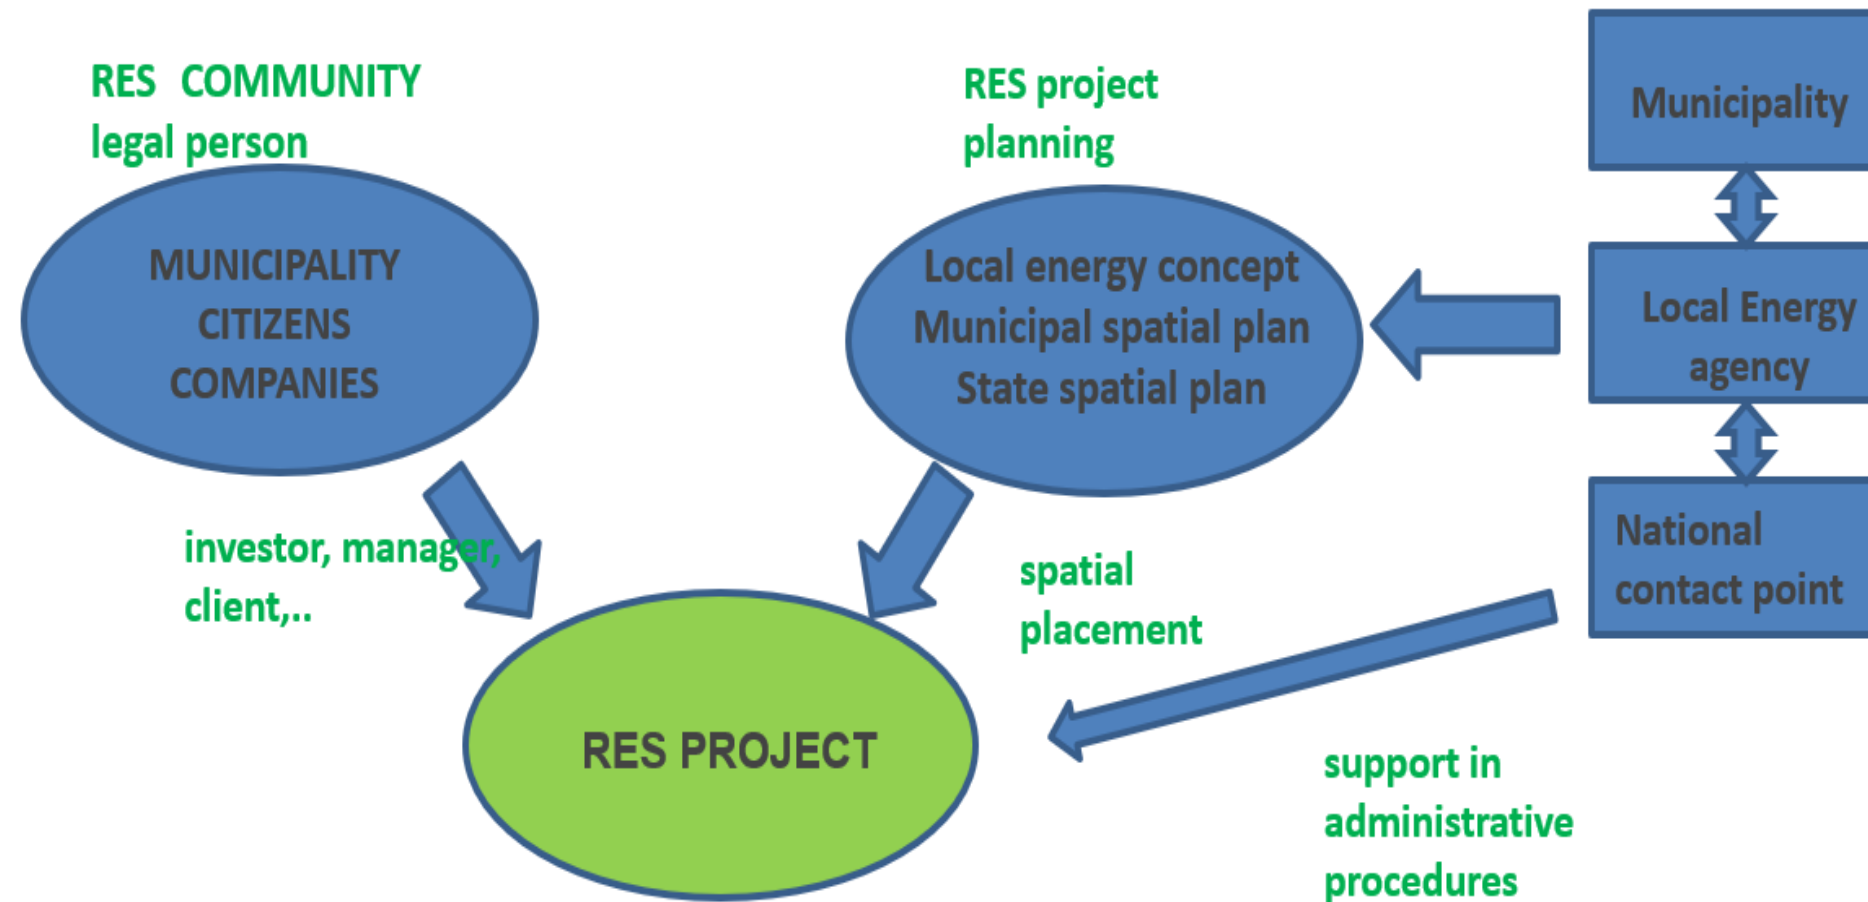

Bottom-up, community-based projects can make a key contribution to achieving national goals.

The one-stop-shop will play a key role in project development.

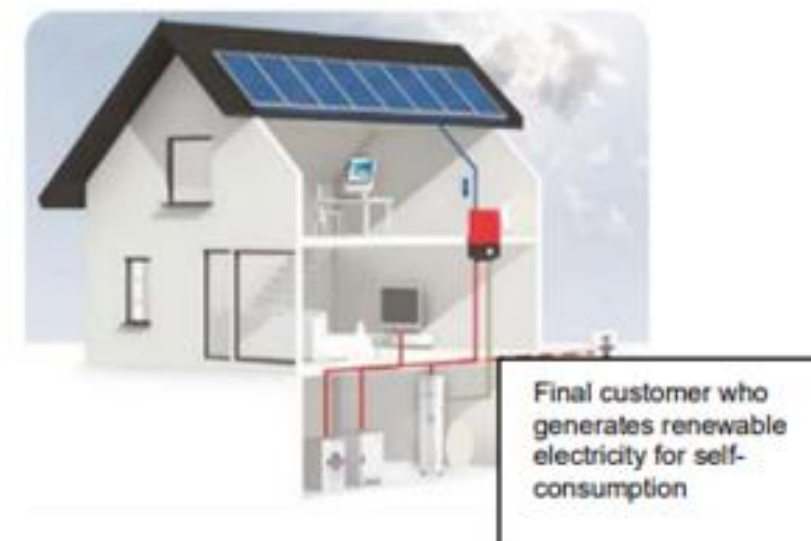

KEY ROLE OF ONE-STOP-SHOP

Future – RES community

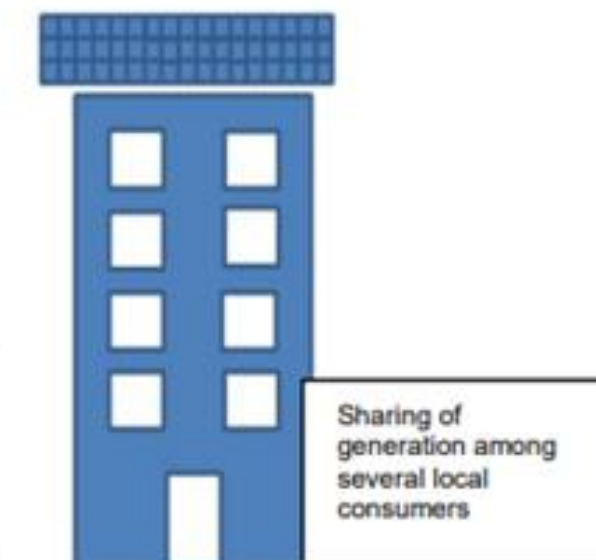

It is important to have all stakeholders working together in One-Stop-Shop, where local energy agencies can play an important role.

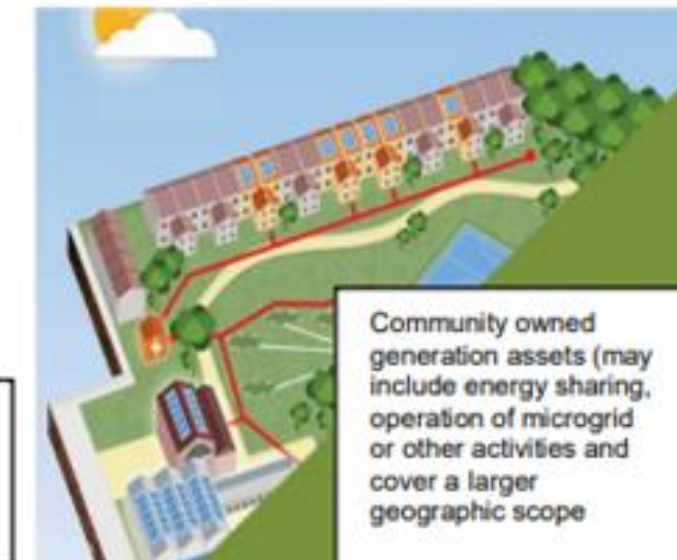

Self-consumption

Collective self-consumption

Energy Community

Thank you for your attention!

Rajko.Leban@kt-ove.si

The future can only be green, sustainable, with efficient material and energy use, otherwise, I am afraid we are the last generation to live better than our parents and where the energy communities of citizens, small and medium-sized enterprises and municipalities play an important role in the green transition.

A key role in project development will be played by One-Stop-Shop, where Local Energy Agencies with their professional staff can be a key stakeholder.
